The OMNi Apparatech Difference

OMNi Apparatech is a premier resource for distributors, offering a one-stop solution for uniquely designed, intelligent apparel. Our brand collections – Zorrel®, Primease®, and vel – feature technical, athleisure, and lifestyle apparel for both men and women.

With a single distribution and decoration facility, we seamlessly serve customers across the U.S. and Canada, offering a range of decoration options with low minimum quantities, quick turn-around times, and competitive pricing. Our centralized location ensures fast and cost-effective delivery from coast to coast.

Our vertically integrated supply chain encompasses the entire textile process, from yarn spinning to complete cut, make, and sew production. This capability allows us to develop technically advanced materials, giving us a competitive edge in product innovation and enabling us to offer trendsetting apparel to a diverse customer base.

At OMNi Apparatech, we are committed to providing superior products made from highly technical fabrics, unparalleled quality embellishments, and dedicated customer service.

We are committed to doing our part for a *Sustainable*

Production Rooted in Responsible, Low-Impact Practices

At our manufacturing facility, we are committed to upholding global standards by reducing our carbon footprint.

Our production processes are designed to minimize water use, energy consumption, waste, and CO₂ emissions. We pair this with the highest chemical compliance standards. As a result, we've earned globally recognized certifications that validate our commitment to responsible textile manufacturing.

We believe that embracing these practices enhances the quality of our work while strengthening the value we provide to our customers.

ECO  **PRODUCED**

Global Standards That Validate Our Commitment

Our sustainability practices are verified by the world's most trusted standards:

BCI – Better Cotton Initiative
Promoting responsible cotton farming
with reduced water and chemical use

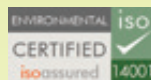

SGS
Third-party certification for
compliance, safety, and sustainability

GRS – Global Recycled Standard
Tracking recycled content
and safe chemistry

GOTS – Global Organic Textile Standard
Ensuring organic fibers and
fair labor practices

ISO 14001
Global standard for environmental
management systems

OEKO-TEX® STANDARD 100
Tested for harmful substances,
safe for skin and the environment

Future

Our Values Guide Every Decision We Make

E

Environmental

Reducing emissions, conserving water and energy, ensuring responsible chemical use, and promoting circular economy practices

S

Social

Ensuring worker safety, diversity, and fair workplace conditions

G

Governance

Leading with transparency and ethical accountability

Strong ESG principles guide our business strategies, ensuring that every decision supports sustainable growth, positive social impact, and responsible governance.

Measured Through The Higg Index

We track our performance using the Higg Index, an industry-recognized sustainability measuring tool:

Raw Material Impact

Manufacturing & Supply Chain Responsibility

Worker Well-Being & Labor Standards

Brand & Retail Sustainability Metrics

This system ensures transparency, comparability, and accountability, aligning us with the best global practices.

GreenTech

Garments Crafted From Sustainable Fabric Innovation

GreenTech fabrics are built on the foundation of sustainability. From the initial concept to raw material selection and production processes, it uses less energy, less water, and generates fewer emissions; all to create a more sustainable environment.

Sustainable Materials

Using premium 100% recycled polyester and/or BCI cotton, we create super-soft and ethically made fashion.

Environmental-Friendly Process

Environmental responsibility is integral to our product creation process. We prioritize efficient resource use and strive to minimize the environmental impact of our operations.

Responsible Waste Management

Beyond adhering to global standards and best practices, we go the extra mile by reducing energy use, waste, water consumption, and CO2 emissions, while also meeting higher chemical compliance standards.

PRIMEASE®

Experience **PREMIUM EASE**

EASY to wear

EASY to care for

EASY choice for you

Blended fabrics continue to reign in the apparel industry and for good reason. By combining just the right amounts of cotton, polyester, and/or rayon, we create high-quality garments that are soft, durable, flexible, and lightweight. With Primease®, you'll discover your new favorite lifestyle apparel, designed to seamlessly blend comfort and style.

Cotton: Breathable, durable, comfortable. These are the hallmarks of the classic fabric we know and love. Over time, cotton has evolved from a scratchy industry standard to combed and ring-spun yarns that deliver an unexpectedly soft touch. Some Primease® styles incorporate BCI cotton through our GreenTech fabric technology, offering a more sustainable way to enjoy this everyday essential.

Polyester: Smooth, shiny, resilient. Polyester is a tough yet lightweight fabric that stands up to wash after wash. It saves us hours of ironing or steam cleaning – wrinkles don't stand a chance. While polyester may contribute to pilling, other fibers in the blend help counteract it, keeping the garment looking newer, longer. Select Primease® styles incorporate recycled polyester through our GreenTech fabric technology, offering a forward-thinking option for eco-conscious comfort.

Rayon: Soft, excellent drape, radiant. Though not featured in all Primease® blends, rayon adds superior drape and flow to a garment. It's a breathable fabric with high moisture absorbency, making it ideal for warmer days. Rayon also helps reduce pilling, although it doesn't combat wrinkles quite like polyester.

With the right balance, Primease® harvests the best qualities each fabric brings to the table. It's no surprise our customers continue to seek the elevated comfort that Primease® delivers.

Wellness Workwear for the *Healthcare Professional*

Vel scrubs are thoughtfully designed to empower healthcare professionals. Tailored to meet the unique demands of those who dedicate themselves to others, vel combines advanced fabric technology, wellness-focused design, and sustainable practices to elevate comfort, support well-being, and contribute to a healthier planet.

FREE MOVE

ECO PRODUCED

Elitech 360: Redefining Performance

At the core of vel is Elitech 360 – a revolutionary, spandex-free 4-way stretch fabric that offers limitless movement, exceptional durability, and lasting shape retention. “Free Move” in every way, it seamlessly adapts to every motion, while its breathable, moisture-wicking properties keep you cool and dry. Wrinkle-resistant, pill-resistant, and quick-drying, Elitech 360 ensures you stay polished and professional with minimal effort.

Wellness-Focused Design

Vel scrubs combine sleek, tailored fits with practical features like functional pockets and jogger bottoms, ensuring optimal comfort and utility during demanding shifts. Thoughtfully designed for healthcare professionals, vel keeps you confident and supported, allowing you to focus on delivering exceptional care.

Sustainability That Matters

Through its Eco Produced initiative, vel embraces renewable energy, recycled water, and waste-reducing technologies to create ethical, eco-friendly workwear. By choosing vel, you align with global sustainability standards and make a meaningful impact – caring for both your patients and the Earth.

Choose vel. Choose Wellness. Choose the Future.

Vel scrubs embody the excellence and care you bring to your work. With performance-driven fabrics, thoughtful design, and a commitment to sustainability, vel supports your well-being, empowers your work, and contributes to a healthier planet.

Next-Level Innovation

The backbone of vel, Elitech 360 fabric offers unbeatable comfort, durability, and performance, with fabric features designed to keep up with your demanding lifestyle.

Mechanical Stretch

Natural stretch from a special knit process ensures flexibility. *

Durable Stretch

Spandex-free fabric retains elasticity over time. *

Shape Retention

Holds its form wash after wash. *

Color Retention

Colors stay vibrant, even with high-heat laundering. *

Pill & Snag Resistant

Smooth, durable, and built to last. *

Moisture Management

Wicks sweat to keep you cool and dry.

Easy Care

Wash, dry, and go – no fading, shrinking, or hassle. *

* This feature has been tested through 100 washes.

Intelligent Apparel *by Design*

Zorrel® stands at the forefront of textile innovation with proprietary technologies engineered for peak performance and exceptional comfort. Each fabric in our collection features advanced attributes tailored to meet the demands of a wide range of activities and environments. From moisture-wicking and temperature regulation to durability and freedom of movement, our technologies help you stay dry, comfortable, and confident – wherever life takes you. Explore our range of advanced fabrics – Dri-Balance™, Syntrel™, GreenTech™, Elitech 360, and Technicore™ – and experience the next evolution in comfort and performance with Zorrel®.

Our Fabric Innovations

Dri-Balance™

Proprietary Double-Layered Construction Ensures a Cool, Dry and Comfortable Feeling

Our textile engineers crafted an intricate knit structure that optimizes moisture transport and dispersion within the cotton layer, allowing air to flow inward and cool the skin. Every Dri-Balance™ fabric features two layers: a 100% microfiber polyester layer against the skin, plaited to a 100% combed cotton surface. This design ensures moisture is instantly transferred from the skin to the cotton, keeping the wearer dry and cool.

Syntrel™

Pure Polyester Knits Engineered for High Performance Activities

Syntrel™ leverages advanced microfiber polyester yarn and knitting technologies to maintain body temperature balance during performance activities. This exclusive Zorrel® fabric excels with its unique blend of specialized hydrophilic and hydrophobic filaments, which work together to wick moisture rapidly away from the body, keeping you dry and comfortable. Lightweight with a pleasing hand feel, Syntrel™ also offers inherent insulation properties, making it the ideal choice for those who demand both comfort and high performance in their activewear.

GreenTech

Inspired by Nature, Designed for Life

GreenTech is a sustainability-focused fabric technology inspired by nature and designed for life. From concept to production, it prioritizes using premium materials like 100% recycled polyester and BCI cotton to support ethically made, ultra-soft fashion. Committed to environmental responsibility, GreenTech utilizes processes that reduce resource consumption, waste, water usage, and CO₂ emissions – all while meeting global chemical compliance standards to help foster a more sustainable future.

Elitech 360

Experience Next-Level Innovation with Elitech 360

Elitech 360 is a revolutionary, spandex-free 4-way stretch fabric that offers limitless movement, exceptional durability, and lasting shape retention. “Free Move” in every way, it seamlessly adapts to every motion, while its breathable, moisture-wicking properties keep you cool and dry. Wrinkle-resistant, pill-resistant, and quick-drying, Elitech 360 ensures you stay polished and professional with minimal effort.

Technicore™

Cotton Feel, Polyester Performance

Technicore™ is a revolutionary technology that transforms 100% polyester fabric using advanced spinning and knitting techniques to mimic the look and feel of fine cotton. Technicore™ surpasses standard cotton by providing UV protection, durable moisture management, superior stability, and pill-resistant qualities.

Let Us Help **Decorate Your Order**

Screen Print

Screen printing is used to create incredibly high-quality designs with vibrant colors that stand out and maintain their clarity and brightness over time.

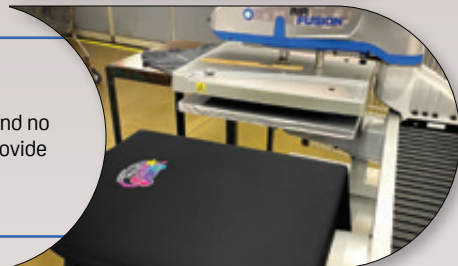

Embroidery

Embroidery provides a timeless, upscale look, perfect for both uniforms and fashion. Utilizing various stitches, this traditional method stitches designs directly onto the fabric.

Heat Transfer

Direct-to-film heat transfers deliver vivid, detailed imagery with a soft, matte finish and no tackiness. Lightweight yet durable, they provide high opacity and full-color CMYK printing.

Dye Sublimation

Dye sublimation printing produces vibrant, permanent colors that are embedded into the fabric rather than applied to the surface. As a result, images on the fabric won't fade or crack, even after multiple washes.

Private Label

Many of our garments can be converted to private labels using a one-color pad print decoration process. For multi-color designs, we can source heat transfer neck labels.

Custom Manufacturing

Innovative Fabrics, Endless Possibilities

At **OMNi Apparatech**, a premier resource for distributors, innovation meets craftsmanship. Our vertically integrated supply chain encompasses the entire textile process, from yarn spinning to complete cut, make, and sew production. This capability allows us to develop technically advanced materials and verify the highest level of quality.

Our **Nan Yang Fabric Innovations Center** gives us the ability to develop and produce apparel that performs, inspires, and lasts. We redefine and master core competencies in knitted fabric design innovations. Whether you are creating uniforms that elevate your brand or lifestyle pieces defining your identity, we make it possible with the same advanced fabric technologies behind our signature collections.

Our Fabric Innovations

From Concept to Creation: Complete Solutions

Every great collection starts with a conversation. Our team collaborates with you to develop apparel that fits your needs—functionally, aesthetically, and sustainably.

As a vertically-integrated company, we facilitate our customers' business by offering a one-stop solution for uniquely designed, intelligent apparel. Our process provides great advantages in terms of quality, lead time, and flexibility. We oversee the entire production process, ensuring product and service integrity.

With custom design, proprietary fabrics, full-scale production, and precise color customization, we bring your vision to life from the first sketch to the final stitch.

How To Measure

Neck: Measure the neck circumference where the standard button-type collar might be fastened.

Sleeve Length: Measure the distance from the prominent bone at the center-back neck, across the shoulder, over the bent elbow, to the center of the wrist bone.

Chest: Measure the chest circumference at the fullest point, keeping the tape horizontal around the body.

Waist: Measure the waist circumference at the smallest part of the waist, often at or above the belly button, keeping the tape horizontal around the body.

Hip: Measure the hip circumference at the fullest part of the seat, keeping the tape horizontal around the body.

Outseam: Measure the distance from the natural waist to the hem.

Colors displayed in the catalog may differ slightly from the actual garment colors due to variations in photography and printing processes.
